Project Guide:- Kushal Birla Sir

• Motivation & Problem Description

MOTIVATION

App Fatigue

Consolidates tools into a single natural-language interface.

Autonomous Execution

Upgrades passive chat to multi-step, tool-calling execution.

Safety Net

Prevents errors via proactive checks, clear logs, and 1-click Undo.

PROBLEM

Fragmented Micro-Workflows

Task switching wastes focus and time.

Reactive & Conversational AI

Assistants mainly answer questions or perform 1-command.

Trust Friction

Users doubt AI taking purely unchangeable actions.

• SDG Alignment, Project Idea & Abstract

09

INDUSTRY, INNOVATION AND INFRASTRUCTURE

TARGET - 9.5

PROJECT IDEA

"Turn one natural-language instruction into a fully planned, executed, and explainable multi-step task."

ABSTRACT — HOW IT WORKS

Understand

Natural Intent Parsing

Plan

Conflict & Risk Detection

Execute

Autonomous Multi-Tool Chaining

Explain

Action Trail & 1-Command Undo

- **SDG Ali** **& Abstract**

Enhance scientific research, upgrade technological capabilities of industrial sectors, and encourage innovation.

09

INDUSTRY, INNO… AND INFRASTRUCTUI

TARGET - 9.5

…l-language instruction into a fully planned, executed, and explainable multi-step task."

• Prototype — Architecture & Interface

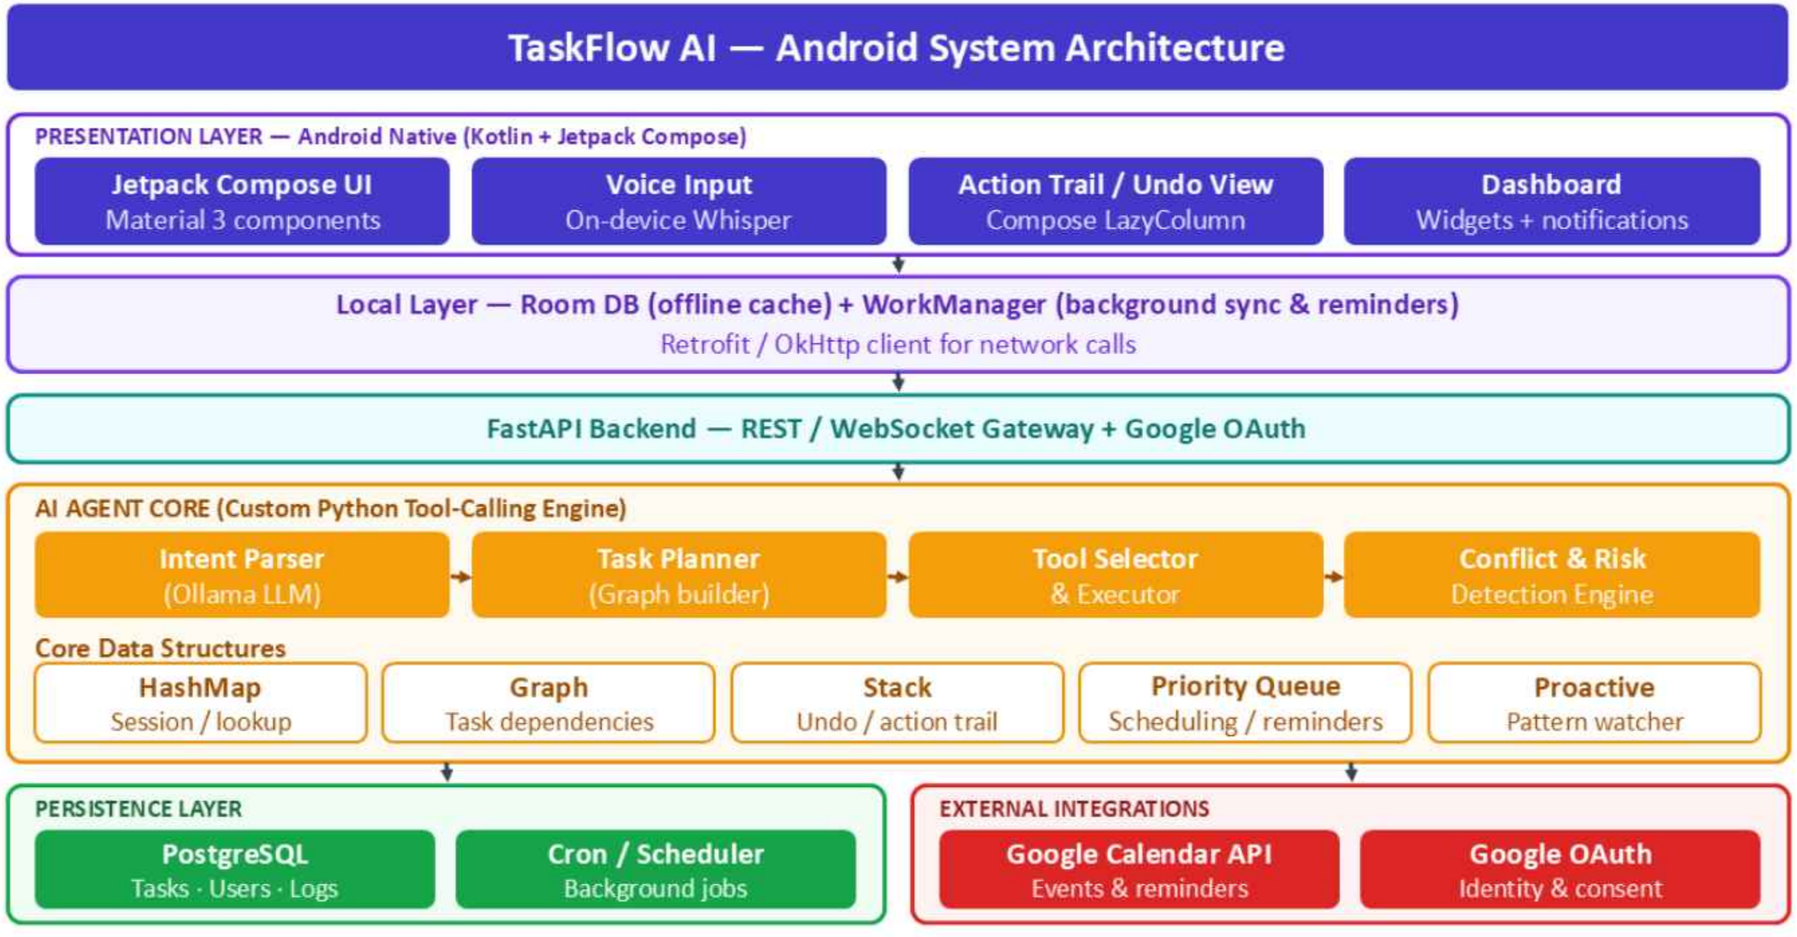

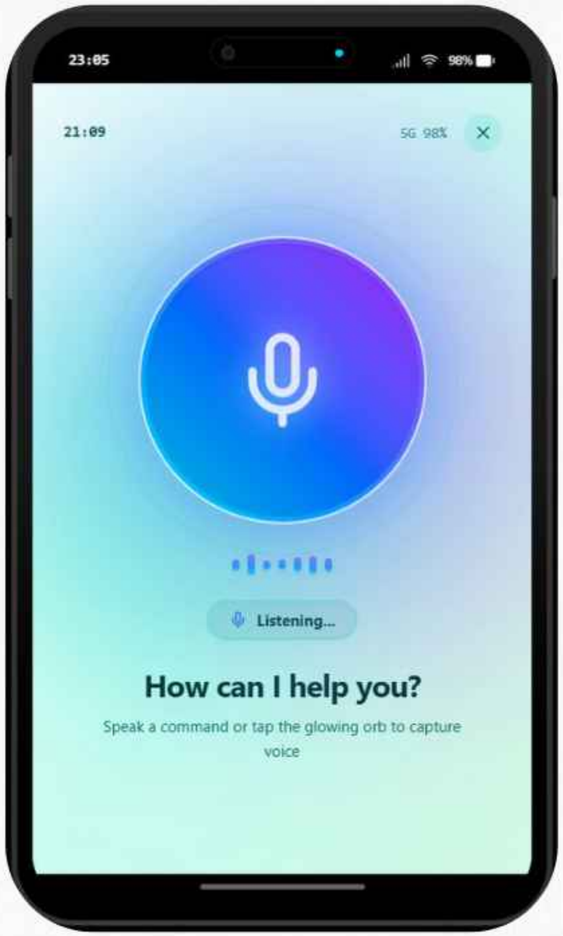

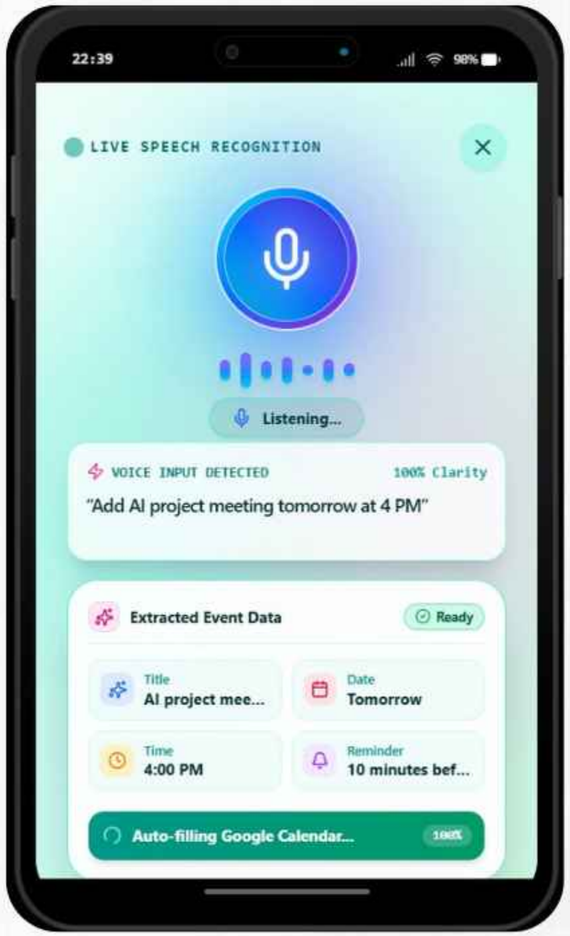

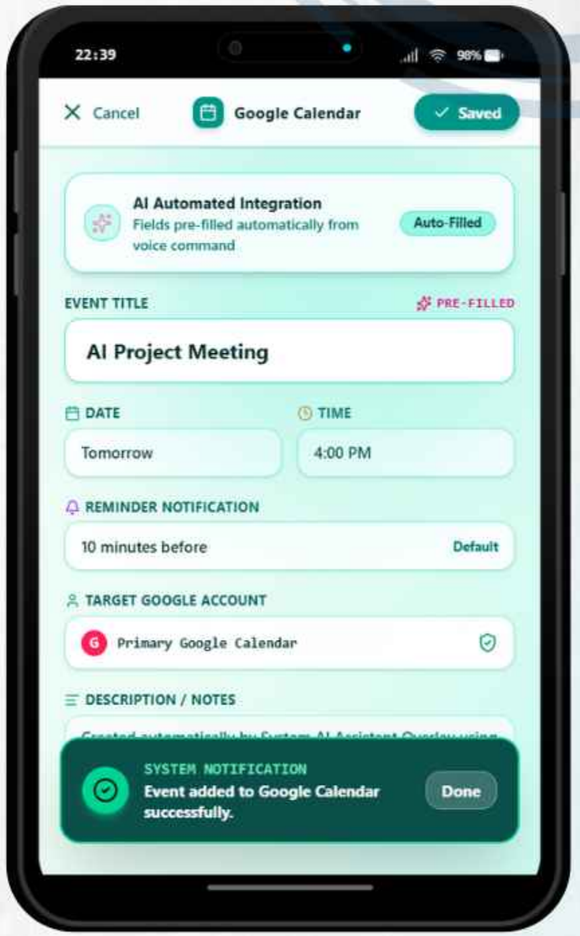

Fig. 3.2 — Android layered architecture: Jetpack Compose Client → Room/WorkManager → Gateway → Agent Core → Persistence / External Services

• Prototype — Architecture & Interface

- # Prototype Validation — Testing Plan

TESTING LEVELS

Scenario Testing

Ask users to complete core tasks, like scheduling a meeting and fixing conflicts.

Visual Clarity

Test if users instantly understand key screens like alerts and logs.

Transparency & Safety

Check if users understand and feel confident using the Undo UI.

• Value Proposition & Business Fit

VALUE PROPOSITION

Massive Time Savings:
One instruction replaces multiple manual app steps for the same outcome.

Flawless Scheduling:
Guarantees zero missed appointments via proactive monitoring.

Earns trust, not just automates
Conflict checks, explanations, and undo make automation safe to rely on.

BUSINESS FIT

Clear early adopters
Students, professionals, and small teams juggling their own schedules.

Freemium potential
Core scheduling free; premium tier for multi-integration and team use.

Built to extend
Modular tool-handlers make new integrations (Slack, email cheap to add.

THANK YOU!!
